Dear Hiring Manager,

I'm a final-year Computer Science student at the University of Western Ontario, graduating in April 2027, and I'm writing to introduce myself as someone who pairs hands-on technical skills with the coordination and follow-through it takes to deliver real results.

Over two co-op terms at Mitsubishi Heavy Industries Regional Jets, I worked where engineering meets operations. As a Project Coordinator, I brought engineering, supply-chain, and procurement teams together to achieve 100% on-time return-to-service on aircraft undergoing critical 40,000-hour heavy checks, owning customer calls and escalations under genuine deadline pressure. As a Performance Analyst, I automated weekly critical-parts reporting across 10,000+ row SAP datasets and built executive dashboards that leadership relied on to make fleet-level decisions. I'm comfortable moving between technical detail and the bigger picture, and translating one into the other.

Outside of work, I build. I've developed a Java educational game with a team using Bitbucket, Jira, and Confluence, written a Python tool for managing airport data and routing flights, and I'm currently co-founding Nera, an on-demand marketplace that makes local work easier to find. As a varsity wrestler, I've learned the value of showing up, doing the unglamorous reps, and staying composed when the pressure is on — habits I bring into every project and team I join.

I'd welcome the opportunity to contribute my technical ability, ownership, and work ethic to your team. Thank you for your time and consideration — I would be glad to discuss how I can help.

Sincerely,
Saleh Farrukh
